PROJECTS

FILMFUSION:

- Designed and developed "**FILMFUSION**", a **Movie recommendation system** that enhanced user engagement by enabling seamless navigation through over 10,000 movies while providing personalized recommendations based on individual preferences.
- JavaScript plays a pivotal role in the website's functionality. It handles user interactions, facilitates asynchronous communication with the server to retrieve and display movie information
- Frontend: HTML, CSS, Vanilla Js, Bootstrap
- Backend: TMDB API, Vanilla Js

PORTFOLIO:

- Here, you'll find a collection of my projects. Each project demonstrates my attention to detail, proficiency in coding, and passion for design, ensuring an engaging user experience.
- I made my portfolio website using **React JS** Technology.
